About Me

IT Graduate specializing in Networking and AI Automation. Experienced in **Python, AI applications, and IoT systems**, with hands-on exposure to **ROS2, Docker, and web technologies**. Strong problem-solving skills and quick to learn in technical environments.

Education Background

Bachelor of Information Technology (Honours) Communications and Networking

University Tunku Abdul Rahman (UTAR), Kampar Campus

2023 – 2026

- **CGPA: 2.7717 / 4.0**
- **UTAR Soft Skills Development Certificate (USSDC) – Platinum Tier.**

Key Projects

Agrishield (Smart Farming) | *Top 32 Semi-Finalist, The GREAT Challenge 2024*

- **Built** a functional prototype using a **recycled scuttle robot** chassis, emphasizing sustainable hardware design.
- **Implemented** an **AI precision detection** model for identifying agricultural threats with a direct link to a **Telegram** notification system.

CropSentinel (Smart Farming) | *Top 8 Finalist, Tech 4 Good 2025*

- **Developed** an advanced **Flask-based Web UI** for real-time data visualization and remote agricultural management.
- **Engineered** a sophisticated **AI-driven Telegram bot** with custom command sets for instant sensor alerts and manual overrides.
- **Improved** system reliability by integrating **data collection logs** to refine AI detection accuracy and hardware power efficiency.
- **Designed** a solar-powered automation kit to support autonomous, off-grid monitoring in rural environments.

Smart Robotic Solution for Sustainable Pest Control in Agriculture | (Final Year Project) *Lead Developer*

- Engineered an autonomous agricultural robot using **ROS2, Raspberry Pi, and Intel AMR Kit** for real-time navigation and precision farming.
- Developed an **AI-powered pest detection system** using **YOLOv5 and computer vision**, enabling targeted pesticide spraying and reducing chemical usage.
- Integrated an **IoT-based monitoring system** using **Node-RED, MQTT, and Telegram Bot** for real-time alerts and remote control.

Working Experience

Internship as Website Designer at SL Software Solution Sdn Bhd

October 2025 – January 2026

- Designed and developed website pages using **WordPress** and **Odoo**, ensuring responsive and user-friendly layouts.
- Customized **themes, layouts, and content** to meet client requirements and branding guidelines.
- Managed **backends configurations**, including content updates, plugin/module setup, and basic system settings.
- Improved website performance and visibility by implementing **SEO best practices** (on-page optimization, keywords, metadata, and site structure).

Technical Skills / Tools

DevOps & Tools: Docker (Containerization), Linux (Ubuntu/CentOS), Oracle Virtual Box.

Robotics & AI: ROS2, TurtleBot3, Flask Web UI, AI-based Precision Detection.

Networking: CCNA (Enterprise Security, Routing, & Automation), Cisco Packet Tracer.

Programming: Python, C++, Java, JavaScript, SQL, HTML.

Languages: English (Muet Band 3.5), Mandarin (Native Language), Malay (Intermediate)

Certificates / Badges

CISCO CERTIFIED NETWORK ASSOCIATE(CCNA)

September 2025
